

MOHAMMAD SHAH ALAM

Software Quality Assurance Engineer | Test Automation Specialist

Mohammadpur, Dhaka 1207, Bangladesh | +880 1856 605725 (Mobile / WhatsApp)
shahalam.tasin@gmail.com | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Results-driven Software Quality Assurance Engineer with 3.5+ years across fintech / ERP and e-commerce platforms, combining strong manual testing discipline with hands-on Java automation engineering. Built a complete test automation framework from scratch (Selenium, TestNG, Cucumber, Gradle) and lead API automation with REST Assured, nearly doubling integration test coverage while cutting regression cycle time by over 70%. Known for owning quality on complex, high-stakes financial processes and mentoring junior QA engineers on framework and test-design standards. Seeking a mid-to-senior QA Engineer / SDET role where deep automation expertise and end-to-end ownership of product quality can drive measurable release confidence and delivery speed.

PERSONAL DETAILS

Nationality: Bangladeshi | **Languages:** Bengali (Native), English (Professional), Hindi (Conversational)

TECHNICAL SKILLS

Programming & Databases: Java, Python, SQL (MySQL, PostgreSQL, Oracle), JavaScript (working knowledge)
Test Automation: Selenium WebDriver, Playwright (Python), Pytest, TestNG, Cucumber BDD, Page Object Model, data-driven & hybrid frameworks
API & Performance Testing: REST Assured, Postman, Swagger, REST, JSON validation, OAuth 2.0, Apache JMeter (load, stress)
CI/CD, Tools & Process: Gradle, Maven, Git / GitHub, Docker (test environment setup), Allure and Extent reporting, Jira, Confluence, Zephyr, Agile / Scrum, SDLC / STLC, requirement traceability matrix, shift-left testing
Testing Types & Design: Functional, Regression, Smoke & Sanity, Integration, System, End-to-End, UAT, Exploratory, Database, API security; BVA, equivalence partitioning, decision table, risk-based test design

PROFESSIONAL EXPERIENCE

- Software Quality Assurance Engineer** Oct 2024 – Present
BRAC IT Services Limited — Fintech / ERP | Dhaka, Bangladesh
 - Architected and built the project's complete test automation framework from scratch in Java (Selenium WebDriver, TestNG, Cucumber, Gradle) — Page Object Model structure, reusable utilities, external test-data management and automated reporting, now scaled to 250+ automated test cases and adopted as the team standard.
 - Designed and implemented a complementary automation structure using Playwright (Python), Pytest and Allure reporting, growing to 45+ test cases and enabling faster execution for select regression scenarios alongside the primary Java framework.
 - Lead API automation for the entire platform using REST Assured, raising end-to-end integration coverage from roughly 40% to over 75% across core services.
 - Delivered a sanity and regression automation suite together with the QA team, reducing an 18-hour manual regression cycle to 4 hours — a reduction of over 70% in per-release testing effort.
 - Own quality for complex financial processes and integrations across interconnected modules and third-party services — validating calculation accuracy, audit trails and compliance rules, and using SQL and log analysis to isolate root cause.
 - Define QA test strategy and sprint-level test plans in collaboration with engineering leads and product managers, contributing key input into go / no-go release readiness decisions for the platform.
 - Integrated the automation suite into CI/CD pipelines with Dockerized test environments and Allure reporting for fast, reliable build feedback; lead code reviews of automation scripts and mentor 2 junior QA engineers on framework usage, test design and coding standards.
 - Use AI tools to support test case drafting and requirement analysis, helping cut down the time spent on initial test design for new features.
- Software Quality Assurance Engineer** Feb 2023 – Sep 2024
Bit Mascot (Pvt.) Ltd. — E-commerce & CMS Products | Dhaka, Bangladesh
 - Owned manual and automated testing for a multi-tenant CMS platform serving clients across multiple countries, helping ensure stable, low-risk production rollouts each release cycle.
 - Performed API testing with Postman across authentication, authorization and payment flows, building reusable collections and assertion scripts that cut API regression time by approximately 40%.
 - Executed integration, UX and cross-browser / cross-device testing for e-commerce catalogue and checkout journeys, driving resolution of severe defects before release.
 - Managed the full defect lifecycle in Jira (reproduction, severity/priority triage, root-cause collaboration, closure verification) and facilitated UAT with business stakeholders, converting requirements into acceptance criteria and securing sign-off before each release.
- Intern — BRAC IT Services Limited** Feb 2022 – May 2022
 - Wrote unit tests and supported feature development within an Agile team, gaining early exposure to code review, version control and shift-left testing practices.

EDUCATIONAL QUALIFICATION

M.Sc. in Computer Science & Engineering — Jahangirnagar University | CGPA 3.60 / 4.00 2022 – 2023
B.Sc. in Computer Science & Engineering — AUST, Dhaka | CGPA 3.35 / 4.00 2018 – 2022

TRAINING & CERTIFICATION

Certifications: ISTQB Certified Tester Foundation Level (CTFL) — [in progress, expected 2026]; Performance Testing with Apache JMeter — Udemy; Software Testing Processes & Techniques — Udemy

SOFT SKILLS

Leadership & Mentorship | Cross-Functional Collaboration | Problem-Solving & Analytical Thinking | Ownership & Accountability | Communication
